EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Amendments to the Specification:

On page 2, line 26, "12a" has been changed to --12--.

2. The following is an examiner's statement of reasons for allowance:

DE 3208211 (hereinafter DE '211) teaches an apparatus (shown in Figure 1) for cutting an oval hole in the wall of a tube or pipe (see English abstract as well as at least the first two lines of the machine translation). The device includes a power unit 10 that rotationally drives a spindle 3 about a central axis 3a thereof, and which also includes a drive arrangement for causing tool bit 1 to rotate about its own axis 1a (see Figure 1, for example, as well as the English abstract). In order to provide elliptical movement of the cutting tool, there is provided a cam and follower arrangement 13/14 which, when hand wheel 15 is cranked by a user, causes left/right (with respect to Figure 1) movement of the member 14 along the member 13, which in turn causes vertical (with respect to Figure 1) axial displacement of the spindle 3 and tool 1 (see Figure 1 as well as the English abstract, for example).

Note that there is no "cogged wheel, which through the transmission of a cam lever is adapted to drive a shaft whose rotational motion is transmitted on the one hand to drive the gear" (the "gear" having been previously claimed as a gear "meshing with a second toothed rim of the

Art Unit: 3726

tool for rotating it slowly...) "and on the other hand to work the carriage back and forth in relation to the baseplate, a round-trip displacement being equal to a difference between the major axis and the minor axis of a desired ellipse" as set forth in independent claim 1.

Note that the lever 17 shown in Figure 1 is not any sort of "cam lever", and that DE '211 does not teach any sort of "cam lever" at all, much less one configured and arranged as set forth in independent claim 1. Furthermore, the up/down cam arrangement 13/14 does not serve to drive any shaft "whose rotational motion is transmitted on the one hand to drive the gear" (the gear that meshes with "a second toothed rim of the tool for rotating it slowly, whereby a cutter head is carried by said slow rotational motion relative to the carriage along a circular path" as set forth previously in claim 1) "and on the other hand to work the carriage back and forth in relation to the baseplate...".

Also, there is no combinable teaching in the prior art of record that would, reasonably and absent impermissible hindsight, motivate one having ordinary skill in the art to so modify the teachings of DE '211, and thus, for at least the foregoing reasoning, DE '211 does not render obvious the present invention as set forth in independent claim 1.

The aforescribed prior art being representative of the closest prior art of record, for at least the foregoing reasoning, the prior art of record neither anticipates nor renders obvious the present invention as set forth in independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Oath/Declaration

3. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be “material to patentability as defined in 37 CFR 1.56.”

In particular, it is noted that the declaration submitted July 29, 2008 refers to a duty to disclose information “material to the patentability of this application in accordance with Title 37, Code of Federal Regulations, 1.56(a)” (i.e., refers to 37 CFR 1.56(a), rather than 37 CFR 1.56).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erica E. Cadugan whose telephone number is (571) 272-4474.

The examiner can normally be reached on Monday-Thursday, 5:30 a.m. to 4:00 p.m..
